

# WELLINGTON WATER

## RESIDENTIAL RATE INCREASE PART TWO

Part two of the Wellington Utility rate increase is effective January 2021. The change will be reflected on your next bill arriving in February.

This change is the final step of a two part plan needed to align rates with the cost of service. A two part increase was selected to give users as much time to prepare as possible.

### Three Reasons for Increase

- Capital improvement needed to maintain water quality standards
- Rising cost to purchase water
- Expanded infrastructure needed to meet current and growing demands
